# Subject Index

**A**

Adrenal cortex 70–74
Aging 339
Alfalfa, RFLP linkage map of 167–170
Allozymes 81–83
*Alouatta seniculus* chromosomes 331–334
Androgenesis 77–81
*Anopheles gambiae. See* Mosquito
Anthocyanin pigmentation 241–245
*Apis mellifera. See* Honey bee
Apomixis 108–111
*Aster kantoensis* 378–380
Autosomal dominant polycystic kidney disease (ADPKD) 1–5
Autotetraploidy, in *Aster kantoensis* 378–380

**B**

Backcrossing 136–138
Barley, cytoplasmic mutants in 385–389
Bean, inheritance of bracteoles in 329–331
Brittany spaniels, restriction fragment length polymorphims in 15–20
*Bulinus globosus,* genetic variation in 288–294
Butterfly, wing color pattern in 142–149

**C**

Callitrichids, litter size and infant survival in 74–77
Canine genetic linkage 15–20
*Capsicum,* mutagenesis 239–241
Carnation, isozyme variability in 112–118
Carotenoids
  in carrot, 380–382
in maize 396–399
Carrot
  pigmentation in 380–382
  resistance to root-knot nematode 119–123
  storage root pigmentation in 63–66
Cat, coat color alleles in 473–475
Catecholamines 175–190
Cattle
  genetic linkage mapping 156–161
  male linkage map of 261–271
cDNA 6–9
Cell adhesion 482
Centrosema, genetic variability and mating system in 124–130
Cerebullar vermis defect mutation, of rat 161–162
Chicken, chromosome 1 in 67–70
Chicken genetic map 67–70
Chicken insulin-like growth factor 1 gene 10–14
Chicken linkage maps 6–9
Chicken molecular map 10–14
Chlorophyll deficient mutant
  in lettuce 314–318
  in melon 245–247
Chlorophyll mutants 385–389
Chromosomal inversions 191–198
Chromosome 1 10–14, 67–70
Chromosome 13 87–95
Chromosome balancers 27–34
Chromosome extraction 224–232
Chromosomes
  *Alouatta seniculus* monkeys 331–334
  chicken 10–14, 67–70
  *Drosophila* 191–198
  mouse 87–95, 162–167, 252–258, 334–338
  pig 272–276
  red flour beetle 27–34, 224–232
  sheep 358–363
  soybean 308–313
  wheat 295–307
Coat color
  in domestic cat 473–475
  in mouse 403–406
  in pig 272–276
Coat color mutant genes 155–156
Collared flycatcher, heritability estimates in 199–204
Common bean, inheritance of crippled trifoliolate leaves in 464–469
Common rust, resistance to 219–223
*Corngrass1* mutation of maize 219–223
Crippled trifoliolate leaves, in common bean 464–469
Crossover suppressors 27–34
Crown rust 427–432

**D**

Darwin, and Mendel 205–213
Deletion stocks 295–307
Dense incisors mutation, of mouse 162–167
Disomic inheritance 54–62
DNA
  in dog 450–455
  in *Pisum sativum* replication 233–237
DNA fingerprinting 77–81
*Dopa decarboxylase* gene cluster mutants, in *Drosophila melanogaster* 175–190
*Drosophila melanogaster* 175–190, 399–403
*Drosophila willistoni* 191–198

**E**

Early infant survival 74–77
Education 238–239
Endogenous viral elements 67–70
Environmental variables 74–77
Enzyme polymorphisms 131–135
Ethyl methanesulfonate (EMS) 239–241
European corn borer, resistance to 219–223
Evolution 205–213
Evolutionary models 199–204
Eye-color mutations 48–53

**F**

Fertility 96–107
Flower color, inheritance of 241–245, 247–248
Fluctuating asymmetry, in rat 277–287
Fluorescent in situ hybridization (FISH) 308–313
Foxtail millet, dinitroaniline resistance in 423–426
Fumarate hydratase 81–83

**G**

Gene diversity 41–47
Gene flow 41–47
Genetic linkage mapping
  in alfalfa 167–170
  in canines 15–20
  in cattle 156–161, 261–271
  in chicken 6–9, 10–14, 67–70
  in *Drosophila melanogaster* 399–403
  in Hessian fly 476–481
  in mouse 87–95, 252–258

# Subject Index

**A**

Adrenal cortex 70–74
Aging 339
Alfalfa, RFLP linkage map of 167–170
Allozymes 81–83
*Alouatta seniculus* chromosomes 331–334
Androgenesis 77–81
*Anopheles gambiae. See* Mosquito
Anthocyanin pigmentation 241–245
*Apis mellifera. See* Honey bee
Apomixis 108–111
*Aster kantoensis* 378–380
Autosomal dominant polycystic kidney disease (ADPKD) 1–5
Autotetraploidy, in *Aster kantoensis* 378–380

**B**

Backcrossing 136–138
Barley, cytoplasmic mutants in 385–389
Bean, inheritance of bracteoles in 329–331
Brittany spaniels, restriction fragment length polymorphims in 15–20
*Bulinus globosus,* genetic variation in 288–294
Butterfly, wing color pattern in 142–149

**C**

Callitrichids, litter size and infant survival in 74–77
Canine genetic linkage 15–20
*Capsicum,* mutagenesis 239–241
Carnation, isozyme variability in 112–118
Carotenoids
  in carrot, 380–382
in maize 396–399
Carrot
  pigmentation in 380–382
  resistance to root-knot nematode 119–123
  storage root pigmentation in 63–66
Cat, coat color alleles in 473–475
Catecholamines 175–190
Cattle
  genetic linkage mapping 156–161
  male linkage map of 261–271
cDNA 6–9
Cell adhesion 482
Centrosema, genetic variability and mating system in 124–130
Cerebullar vermis defect mutation, of rat 161–162
Chicken, chromosome 1 in 67–70
Chicken genetic map 67–70
Chicken insulin-like growth factor 1 gene 10–14
Chicken linkage maps 6–9
Chicken molecular map 10–14
Chlorophyll deficient mutant
  in lettuce 314–318
  in melon 245–247
Chlorophyll mutants 385–389
Chromosomal inversions 191–198
Chromosome 1 10–14, 67–70
Chromosome 13 87–95
Chromosome balancers 27–34
Chromosome extraction 224–232
Chromosomes
  *Alouatta seniculus* monkeys 331–334
  chicken 10–14, 67–70
  *Drosophila* 191–198
  mouse 87–95, 162–167, 252–258, 334–338
  pig 272–276
  red flour beetle 27–34, 224–232
  sheep 358–363
  soybean 308–313
  wheat 295–307
Coat color
  in domestic cat 473–475
  in mouse 403–406
  in pig 272–276
Coat color mutant genes 155–156
Collared flycatcher, heritability estimates in 199–204
Common bean, inheritance of crippled trifoliolate leaves in 464–469
Common rust, resistance to 219–223
*Corngrass1* mutation of maize 219–223
Crippled trifoliolate leaves, in common bean 464–469
Crossover suppressors 27–34
Crown rust 427–432

**D**

Darwin, and Mendel 205–213
Deletion stocks 295–307
Dense incisors mutation, of mouse 162–167
Disomic inheritance 54–62
DNA
  in dog 450–455
  in *Pisum sativum* replication 233–237
DNA fingerprinting 77–81
*Dopa decarboxylase* gene cluster mutants, in *Drosophila melanogaster* 175–190
*Drosophila melanogaster* 175–190, 399–403
*Drosophila willistoni* 191–198

**E**

Early infant survival 74–77
Education 238–239
Endogenous viral elements 67–70
Environmental variables 74–77
Enzyme polymorphisms 131–135
Ethyl methanesulfonate (EMS) 239–241
European corn borer, resistance to 219–223
Evolution 205–213
Evolutionary models 199–204
Eye-color mutations 48–53

**F**

Fertility 96–107
Flower color, inheritance of 241–245, 247–248
Fluctuating asymmetry, in rat 277–287
Fluorescent in situ hybridization (FISH) 308–313
Foxtail millet, dinitroaniline resistance in 423–426
Fumarate hydratase 81–83

**G**

Gene diversity 41–47
Gene flow 41–47
Genetic linkage mapping
  in alfalfa 167–170
  in canines 15–20
  in cattle 156–161, 261–271
  in chicken 6–9, 10–14, 67–70
  in *Drosophila melanogaster* 399–403
  in Hessian fly 476–481
  in mouse 87–95, 252–258

in pig 272–276
in red flour beetle 224–232
in soybean 308–313
in sweet cherry 214–218
Genetic markers 136–138
Genetic variability 124–130
Genetic variation 136–138
in *Bulinus globosus* 288–294
in maize 319–328
in pocket gophers 341–350
in primates 406–410
Genomic in situ hybridization (GISH) 308–313
Groundnut, flower color in 247–248
Guinea fowl, inheritance of plumage color in 138–142
Gynogenesis 77–81

H

Herbicide resistance 423–426
Hereditary canine spinal muscular atrophy 15–20
Heritability estimates, in collared flycatcher 199–204
Hessian fly, linkage map of 476–481
Heteroduplex mobility assays 456–460
Heterologous DNA probes 15–20
Heteroplasmy 21–26
Heterozygosity 341–350
*Hippodamia variegata*. *See* Ladybird beetle
Homeotic mutant 66–67
Honey bee, mitochondrial DNA variation in 35–40
*Horns* locus, in sheep 358–363

I

Inbred-backcross breeding 410–412
Inbreeding, effects on skeletal development 277–287
Insect molecular genetics 84
Insecticide, resistance genes in mosquitoes 444–449
Isogenicity 77–81
Isozyme variability 112–118
Isozymes, inheritance of 364–370

J

Japanese quail, plumage color mutation in 248–252

K

Koala, microsatellite loci of 149–152

L

Ladybird beetle, gene flow at allozyme loci of 41–47
*Lanius ludovicianus*. *See* Loggerhead shrike
Lateral branching, genetic control of 371–377
Lettuce, chlorophyll deficiency in 314–318
Linkage analysis 67–70
Loggerhead shrike, tandem repeats in mitochondrial control region of 21–26

M

*Maclura pomifera* 469–473
Maize
disease and insect resistance in 219–223
genetic variation in 319–328
microsatellite variation in 396–399
resistance to rot 382–385
seedling mutant in 389–391
transfer of apomixis into 108–111
Mastomys, border zone formation in 70–74
Mating systems
in genus *Centrosema* 124–130
of western larch 438–443
Melanic phenotypes 351–357
Melon, chlorophyll-deficient mutant in 245–247
Mendel, and Darwin 205–213
Mesenchymal dysplasia 87–95
Microphthalmia cloudy-eye allele 334–338
Microsatellite loci
of koala 149–152
of timber rattlesnake 152–155
Microsatellite repeat variation 396–399
Microsatellites, human 406–410
Mimetic coloration 142–149
Mitochondrial DNA control region 21–26
Mitochondrial DNA variation 35–40
Mosquito
eye color mutations in 48–53
resistance to insecticides 444–449
Mouse
chromosomes in 252–258
coat color mutation in 403–406
genetic map 87–95
mutant allele 334–338
Mutagenesis, in *capsicum* 239–241

N

Natricine snakes, fumarate hydratase alleles in 81–83

O

Oak, isozyme inheritance in 364–370
Oat, resistance to crown rust in 427–432
*Oncorhynchus mykiss*. *See* Rainbow trout
*Onobrychis viciaefolia* Scop. *See* Sainfoin
Outcrossing 124–130

P

P elements 191–198
Pearl millet
recessive homeotic mutant in 66–67
semidwarf mutant in 170–172
Peppered moth, melanism in 351–357
*Peromyscus*. *See* Mouse
Persian cats, polycystic kidney disease in 1–5
*Petrogale*. *See* Rock wallaby
Petunia, inheritance of flower color in 241–245
*Petunia hybrida*, mutations in 371–377
Phenotypic variation 341–350
Phylogenetic relationships 456–460
*Pink-eye* gene 48–53
*Pisum sativum* 233–237
Plumage color 138–142
Plumage in Japanese quail 248–252
Pocket gophers 341–350
Polled locus 156–161
Polycystic kidney disease 1–5
Polyhaploids 108–111
Polymerase chain reaction (PCR) 149–152, 214–218, 252–258, 308–313, 396–399, 406–410, 450–455
Population genetics 288–294, 319–328
Population growth 238–239
*Praomys coucha*. *See* Mastomys
Primates 406–410
Protein protease inhibitors 461–463

R

Rainbow trout, DNA fingerprinting of 77–81
Random amplified polymorphic DNA (RAPD) 214–218
Rat
inbreeding effects on 277–287
neurological mutation in 161–162
Recessive mouse mutation 87–95
Recombination 27–34
Red flour beetle
chromosome extraction in 224–232
crossover suppressors in 27–34
Restriction fragment length polymorphism (RFLP)
on alfalfa 167–170
on canines 15–20
on chicken 6–9, 10–14
*Rhododendron*, enzyme polymorphisms among 131–135
Rock wallaby, fertility, synaptonemal complexes, and spermiogenesis in 96–107
Root-knot nematode, resistance in inheritance 119–123
Russian dwarf hamster, coat color mutant genes in 155–156

S

Sainfoin, genetic basis of variation in 54–62
Semidwarf mutant, in pearl millet 170–172
Sex-linked inheritance 81–83
Soybean
chromosomes in 308–313

*k2* and *Mdh1-n* loci in 433–437
necrotic root mutants in 415–422
Spermiogenesis 96–107
Squash, coloration 391–395
Stomates, in maize 389–391
Storage root pigmentation 63–66
Sweet cherry 214–218
Synaptonemal complexes 96–107

T

Tandemly repeated sequences 21–26
Teosinte, microsatellite variation in 396–399
Tetrasomic inheritance 54–62, 378–380, 469–473
Timber rattlesnake, microsatellite loci of 152–155
Transposable elements in *Drosophila melanogaster* 399–403
*Tribolium castaneum*. *See* Red flour beetle
*Tripsacum* 108–111
Tyrosine aminotransferase 272–276

V

Variance in litter size 74–77

W

Western larch, mating systems of 438–443
Wheat, Chinese Spring cultivar 295–307
*White* gene 48–53
Wing color pattern 142–149

Y

Yeast Artificial Chromosomes 413

# Title Index

**A**

Albino and Pink-Eyed Dilution Mutants in the Russian Dwarf Hamster *Phodopus campbelli* 155–156

Arbitrary Primer PCR of Dog DNA With Estimates of Average Heterozygosity 450–455

**C**

Canine Genetic Linkage Study Using Heterologous DNA Probes 15–20

*Cell Adhesion and Human Disease* (book review) 482

Cerebellar Vermis Defect: A New Neurological Mutation in the Rat 161–162

Characterization of Interpopulation Genetic Variability in Three Hybrid Maize Populations 319–328

Chromosome Extraction and Revision of Linkage Group 2 in *Tribolium castaneum* 224–232

Chromosomes of *Alouatta seniculus* (Platyrrhini, Primates) From French Guiana 331–334

Coat Color Alleles in the Domestic Cat Populations at the Adriatic Coast 473–475

Coat Color Genetics of *Peromyscus*: V. California Blonde, A New Recessive Mutation in the

Deer Mouse 403–406

*Corngrass1* of Maize (*Zea mays* L.) Delays Development of Adult Plant Resistance to Common Rust (*Puccinia sorghi* Schw.) and European Corn Borer (*Ostrinia nubilalis* Hubner) 219–223

Crossover Suppressors in *Tribolium castaneum* 27–34

Crown Rust Resistance Loci on Linkage Groups 4 and 13 in Cultivated Oat 427–432

**D**

The Deletion Stocks of Common Wheat 295–307

Dense Incisors (*din*): A New Mouse Mutation on Chromosome 16 Affecting Tooth Eruption and Body Size 162–167

Derivation and Characterization of a Somatic Cell Hybrid Containing the Portion of Mouse Chromosome 11 (MMU11) Homologous to Human Chromosome 17q 252–258

DNA Fingerprinting Confirms Isogenicity of Androgenetically Derived Rainbow Trout Lines 77–81

**E**

Effects of Inbreeding on Skeletal Development of *Rattus villosissimus* 277–287

Electrophoretic Evidence for Tetrasomic Inheritance in the Dioecious Tree *Maclura pomifera* (Raf.) Schneid 469–473

Estimating and Testing Hypotheses About the Number of Genes Using Inbred-Backcross Data 410–412

Ethyl Methanesulfonate-Induced Seed Mutagenesis of *Capsicum annuum* 239–241

The Extension Coat Color Locus and the Loci for Blood Group O and Tyrosine Aminotransferase Are on Pig Chromosome 6 272–276

**F**

Fawn-2: A Dominant Plumage Color Mutation in Japanese Quail 248–252

**G**

Gene Flow in Colonizing *Hippodamia variegata* Ladybird Beetle Populations 41–47

Genetic and Environmental Impacts on Litter Size and Early Infant Survival in Three Species of Callitrichids 74–77

Genetic and Physical Mapping of the Chicken IGF1 Gene to Chromosome 1 and Conservation of Synteny With Other Vertebrate Genomes 10–14

Genetic Control of Dinitroaniline Resistance in Foxtail Millet (*Setaria italica*) 423–426

Genetic Regulation of Border Zone Formation in Female Mastomys (*Praomys coucha*) Adrenal Cortex 70–74

Genetic Variability and Mating System in Three Species of the Genus *Centrosema* 124–130

Genetics of Isozyme Polymorphisms in Carnation 112–118

The Genetics of the Mimetic Coloration in the Butterfly *Heliconius cydno weymeri* 142–149

Genomic Distribution of P Elements in *Drosophila willistoni* and a Search for Their Relationship With Chromosomal Inversions 191–198

Guinea Fowl Plumage Color Inheritance, With Particular Attention on the Dun Color 138–142

**H**

Heteroduplex Mobility Assays (HMAs) and Analogous Sequence Analysis of a Cytochrome b Region Indicate Phylogenetic Relationships of Selected Callitrichids 456–460

*Hinf*I Variation in Mitochondrial DNA of Old World Honey Bee Subspecies 35–40

Human Microsatellites Applicable for Analysis of Genetic Variation in Apes and Old World Monkeys 406–410

**I**

Inheritance and Expression of Purple and Yellow Storage Root Color in Carrot 63–66

Inheritance and Linkage With the *k2* and *Mdh1-n* Loci in Soybean 433–437

Inheritance of a Recessive Character Controlling Reduced Carotenoid Pigmentation in Carrot (*Daucus carota* L.) 380–382

Inheritance of Chlorophyll Deficiency Traits in Lettuce 314–318

Inheritance of Crippled Trifoliolate Leaves Occurring in Interracial Crosses of Common Bean and Its Relationship With Hybrid Dwarfism 464–469

The Inheritance of Flower Color in *Petunia hybrida* Vilm 241–245
Inheritance of Isozymes in Pedunculate Oak (*Quercus robur* L.) 364–370
Inheritance of Kernel Resistance to *Fusarium graminearum* in Maize 382–385
Inheritance of Polycystic Kidney Disease in Persian Cats 1–5
Inheritance of Protease Inhibitors in *Glycine tomentella* Hayata ($2n = 38$), a Perennial Relative of Soybean 461–463
Inheritance of Triangular and Ovate Bracteoles in Common Bean 329–331
*Insect Molecular Genetics: An Introduction to Principles and Applications* (book review) 84
Insecticide Resistance Genes in Mosquitoes: Their Mutations, Migration, and Selection in Field Populations 444–449
Isolation and Characterization of Microsatellite Loci for Use in Population Genetic Analysis in the Timber Rattlesnake, *Crotalus horridus* 152–155

L

Linkage Analysis of Endogenous Viral Element 1, Blue Eggshell, and Pea Comb Loci in Chickens 67–70
A Linkage Map of Seven Allozyme Loci in the Hessian Fly 476–481
A Linkage Map of Sweet Cherry Based on RAPD Analysis of a Micropsore-Derived Callus Culture Population 214–218
Linkage of Semidwarf Phenotype to Interchange Homozygosity in Pearl Millet 170–172

M

A Male Linkage Map of the Cattle (*Bos taurus*) Genome 261–271
Mapping the *Horns* (*Ho*) Locus in Sheep: A Further Locus Controlling Horn Development in Domestic Animals 358–363
Mendel's Opposition to Evolution and to Darwin 205–213
Mesenchymal Dysplasia: A Recessive Mutation on Chromosome 13 of the Mouse 87–95
Microphthalmia Cloudy-Eye ($mi^{ce}$): A New Murine Allele 334–338
Microsatellite Repeat Variation Within the *y1* Gene of Maize and Teosinte 396–399
*Molecular Aspects of Aging* (book review) 339
Multiple Allelism at the *D* Locus in Squash 391–395
Mutations in the *Anopheles gambiae Pink-Eye* and *White* Genes Define Distinct, Tightly Linked Eye-Color Loci, 48–53
Mutator-Induced Cytoplasmic Mutants in Barley: Genetic Evidence of Activation of a Putative Chloroplast Transposon 385–389

N

New Mutations Affecting Meristem Growth and Potential in *Petunia hybrida* Vilm 371–377
Normal Segregation of Allozyme Markers in Complex Rhododendron Hybrids 131–135

O

An Open Letter to the American Genetic Association: A Neglected Issue 238–239

P

Parallel Rise and Fall of Melanic Peppered Moths in America and Britain 351–357
Partial Resistance to Root-Borne Infection by *Phytophthora sojae* in Three Allelic Necrotic-Root Mutants in Soybean 415–422
Paternity Exclusion in Koalas Using Hypervariable Microsatellites 149–152
Phenetics of Natural Populations. V. Genetic Correlates of Phenotypic Variation in the Pocket Gopher (*Thomomys bottae*) in California 341–350
Phenotypic Analysis of the *Dopa decarboxylase* Gene Cluster Mutants in *Drosophila melanogaster* (The Wilhelmine E. Key 1992 Invitational Lecture) 175–190
The Polled Locus Maps to BTA1 in a *Bos indicus* x *Bos taurus* Cross 156–161
Population Density and Mating Pattern in Western Larch 438–443
Population Genetics and Genetic Variability of *Bulinus globosus* (Gastropoda: Planorbidae) From the Two Main River Systems in Zimbabwe 288–294
Proportion of the Variation in Genetic Composition in Backcrossing Programs Explained by Genetic Markers 136–138

R

A Recessive Homeotic Mutant in Pearl Millet, 66–67
Reproductive Behavior in Maize-*Tripsacum* Polyhaploid Plants: Implications for the Transfer of Apomixis Into Maize 108–111
Resistance to Root Knot Nematode (*Meloidogyne hapla* Chitwood) in Carrot Is Controlled by Two Recessive Genes 119–123
RFLP Linkage Map of an Alfalfa Meiotic Mutant Based on an $F_1$ Population 167–170
RFLP Mapping of Expressed Sequence Tags in the Chicken 6–9

S

A Seedling Lethal Maize Mutant Lacking Functional Leaf Stomates 389–391
Sex-Linked Inheritance of Fumarate Hydratase Alleles in Natricine Snakes 81–83
Soybean Chromosome Painting: A Strategy for Somatic Cytogenetics 308–313
Spermatogenesis and Synaptonemal Complexes of Hybrid *Petrogale* (Marsupialia) 96–107

T

Tandem Repeats and Heteroplasmy in the Mitochondrial DNA Control Region of the Loggerhead Shrike (*Lanius ludovicianus*) 21–26
Temporal Stability and Microgeographic Homogeneity of Heritability Estimates in a Natural Bird Population 199–204
Tetrasomic Inheritance of Isozymes in Sainfoin (*Onobrychis viciaefolia* Scop.) 54–62
Tetrasomic Segregation of Allozyme Markers in an Endangered Plant, *Aster kantoensis* 378–380

U

Unstable White Flower Color in Groundnut (*Arachis hypogaea* L.) 247–248
The Use of Transposable P-elements of *Drosophila melanogaster* for Introductory Genetics Laboratory Courses 399–403

V

Variation of Repetitive DNA Sequences in Progenies of Regenerated Plants of *Pisum sativum* 233–237

Y

Yeast Artificial Chromosomes (YAC) Protocols (book review) 413
*Yellow-Tip*: A Cytoplasmically Inherited Trait in Melon (*Cucumis melo* L.) 245–247
